Okay, I'm a moron, I admit it... I think I totally screwed up the HOWTO SOFTWARE table. I added two Remote X HowTos and wanted to group them under X_Windows since there's SOOOO many X_Window possible HowTos. The table generated two entries for the actual Remote_X HowTos AND an entry for the X_Windows namespace... I'm gonna let the Doku Gods sort this out... – arfon 20120910 4:58pm
