Can you please post a link to needs_attention so we can use the tag search function to easily search for the related entries?

I fixed the Pages that require attention from an editor page … I forgot to inclue the list itself. it should look better now if you click on any page with a “needs attention” tag. I will also add this page on the News from the site admins page I guess.

Thank you for the prompt response and explanation, the index of needed pages looks good here.
